Subject: Support for Approving Yucca Mountain

Part of Records Package / Supplement / Correction

October 11, 2001

Ms. Carol Hanlon
S&ER Products Manager
U. S. Department of Energy
Yucca Mountain Site Characterization Office
P.O. Box 30307 M/S 025
North Las Vegas, NV 89036-0707

Dear Ms. Hanlon:

I am writing to ask that the Department of Energy recommend to President George Bush that the site at Yucca Mountain, Nevada be designated the national repository for high-level radioactive waste and spent fuel.

In light of the current security issues facing both the nuclear industry and the country, storing high-level radioactive waste at one location is a better option than continuing to accumulate spent nuclear fuel at more than 70 sites throughout the nation.

The nuclear industry has been handling, storing and transporting spent nuclear fuel for years and the containers used for these purposes have been designed and built to specifications that can withstand extreme conditions. These containers have been put through exhaustive testing and have an outstanding record of safety and performance.

For this reason, I urge the Department to recommend the Yucca Mountain site to the President.

Sincerely,

Karl K. Moser

6201 Shadowbrook Drive
Bettendorf, Iowa, 52722
